Next Steps & Questions

Overview

Recommendations

1. Buy in Mercer Island or Bellevue School District (Seattle also)
2. Look for land on a waterfront
3. Hire contractors who can increase the quality of construction by a grade for < \$50,000

Where to allocate resources to maximize income

To answer the question, will paying more for _____ result in a high enough increase in the price of the home to turn a bigger profit?

Modeling

Data Available Data on price, square footage, number of bedrooms, zipcode, etc. for ~20,000 homes in King County Washington sold between 2018 and 2019.

Why Linear Regression? Easy to interpret effect of each feature individually.

Metric of Evaluation

R^2 , the coefficient of determination –how well the model describes variance in home price.

72.3%

Regression Results

Biggest effect on R^2

School district and grade had the biggest effects on R^2 , each explaining between 27% and 38% of the variance in price.

Biggest coefficient

A home on a waterfront sells for ~\$175,000 more than a similar home NOT on a waterfront.

\$50,000 at a time

Increasing the grade of construction could net you \$50,000 more on final home price per level increase.

Recommendation 1

School District

Buy land in the **Mercer Island** or **Bellevue** school districts

- Only 6 out of 18 school districts had positive coefficients in our final model

	model_coefficients
Mercer Island	271238.218719
Bellevue	218460.536197
Seattle	112819.435759
Lake Washington	78610.025896
Issaquah	57558.498960
Northshore	49212.151697

A home in Mercer Island sells for ~\$271,238 more than a home in “no school district”

Recommendation 2

Waterfront

Look for land on a waterfront (bays, canals, lakes, rivers)

- Homes on waterfronts sell for around **\$175,000 more** than similar homes not on waterfronts
- Confidence interval: \$150,000 to \$215,000

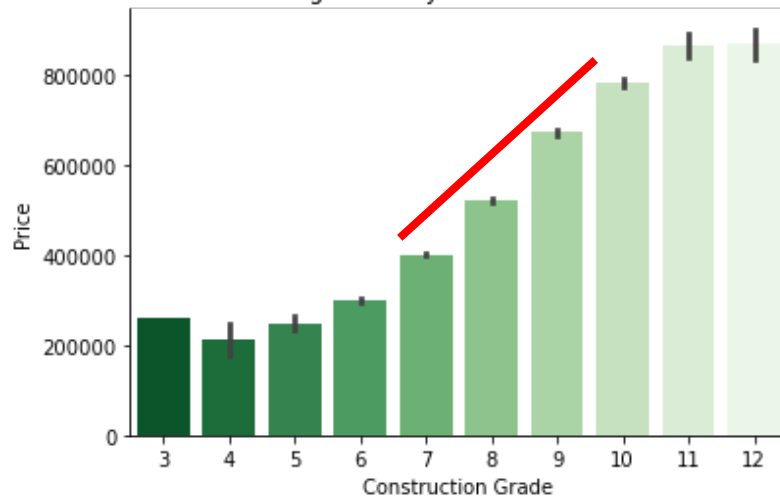

Recommendation 3

Construction Grade

Hire contractors who can increase the quality of construction by a grade for < \$50,000

- King County Assessor Numerical Grade
- Grade of 7 or higher
- Every increase in grade → ~\$50,000 more

Average Price by Construction Grade

Summary of Recommendations

Recommendations

1. Buy in Mercer Island or Bellevue School District (Seattle also)
2. Look for land on a waterfront
3. Hire contractors who can increase the quality of construction by a grade for < \$50,000

Next Steps

- Combine with data on development costs
- Dashboard tool for analyzing development opportunities (internally, and /or to share with investors)
